It is my pleasure to introduce our new "Lands Between."Thank you for your interest in the Land Between, and I hope you enjoy it.The Lands Between is a world that exists before the Elden Ring. Depending on the conditions, the Lands Between is formed, consumed and reformed by the flow of the Land of Elements. The Lands Between can be divided into several types according to the element that the lands are formed from.There are numerous in-game elements that affect the forms of the Lands Between, including the power of the entities that live in the Lands Between, and the influence of the "land" and "flow" of the elements.To sum up, the Lands Between is the world and the land that we call the Elden Ring. It consists of three elements: Land, Flow and the Void.Many of you may not know the Lands Between, but the world above the waters is the world that we know as the Elden Ring. We are the world where the beings that govern the lands reside. In a sense, we are the authority that all of the lands must obey.The Lands Between is divided into different areas with different rules. The three types are the Earth, the Water and the Void.All the lands on the lands above the waters are inhabited by three distinct races. Elden, the Magic Users, Orochi, the Warriors and most recently appeared Hazama, the Elemental Warriors.The Elden, the Magic Users, is a race that has the power of "Casting" (or "Theurgy," as you may call it). They are the descendants of the Celestia War who casted the magic "Nimbus" that is seen above the waters. The race inhabits the lands on the land above the waters, and is therefore accessible to the elemental warriors. The Nautilus ships are their transportation.The Orochi, or the Warriors, is a race that is less technologically advanced than the Elden but are very strong in terms of fighting, and are the direct descendants of the Dragon Race. They also directly inherit the power of the Dragons. They are able to use both the "Strength" and "Speed" of the Dragons, and can utilize their power to push each other high. They travel by flying high-speed ships called the Kai
