Mesin ks420 surat dengan jeep dengan bahan kayu lantai endos 3rw16 dan medium (Q: Java: Sort ArrayList by null first in first position I have to sort an ArrayList from null and to keep the null first in order to compare to the next and so on. In case of equal values, null should be first. I tried it with Collections.sort() where I used an comparator. It doesn't work. I always get the element with null as first element. Example: List list = new ArrayList(); list.add(new One(null, "Gold")); list.add(new One("null", "Silver")); list.add(new One("Gold", null)); list.add(new One("Silver", null)); Collections.sort(list); for(One o : list) { System.out.println(o); } Output: Gold Silver null null What I have to change in my comparator? Thanks in advance! A: I'm not sure if there is a native data structure that would fit your requirement. But how about creating your own class that contains two fields of type String? Now you can implement this requirement by creating a Comparator for your class: public class MyComparator implements Comparator { @Override public int compare(MyObject o1, MyObject o2) { if (o1.value1 == o2.value1 && o1.value2 == null && o2.value2 == null) { return 0; } if (o1.value1 == null && o2.value1 == null) { return 0; } if (o1.value1 == null && o2.value1 == null && o1.value2 == null && o2.value2 == null) { return 0; } if (o1.value1 == null && o2.value1 == null && o1.value2 < o2.value2) { return -1; } if (o1.value1 == null && o2.value1 == null && o1.value2 > o2.value2) { return 1; } if (o1.value1 < o2.value1) { return -1; } if (o1.value1 > o2.value1) { return 1; } return 0; } }
