## What's New In Classic Frames Pack?

Ever wondered how your photos came out in different softwares? Is your photo blown up with the smallest details in the background? What if we told you that there is a simple easy way to help you quickly fix these problems? The Photographer's Toolbox have created a brand new software to automatically identify and fix camera lens distortion, chromatic aberration, and warping. So with one click you can have your photo perfect! This pack includes 12 great and beautiful classic frames. All you need to do is just change the lens and then you will be able to compare the results in real time. Now you can check your photo in all the current photo softwares, the results will always be the same and every lens option will be there. What's Included: Classic Frames Pack includes: A. The final product: 12 frames which have been edited in one of the following software: 1. Photoshop 2. Lightroom 3. CorelDRAW 4. GIMP This pack comes with 12 great and beautiful frames. There are 7\*7cm square, 5\*10cm square, and 2\*14cm square. B. Lens correction  the program you can use to make your photos look professional. 1. Photoshop: Create a new document at 200% of the original size. Open the selected lens. Select the Rectangular Select tool (R) and hold down the ALT key (on PC) or SHIFT key (on Mac). Hold down the SHIFT key, click the Lens Correction option on the Editor tool bar and select Frame Auto-Align. In the Tool Bar you will see the Frame Auto Align button. Click on that and then click the OK button. 2. Lightroom: Open the Lens Correction panel (found in the Develop tab) and select the Frame Auto-Align button. In the Tool Bar you will see the Frame Auto Align button. Click on that and then click the OK button. 3. CorelDRAW: Open the Lens Correction panel and select the Frame Auto-Align button. In the Tool Bar you will see the Frame Auto Align button. Click on that and then click the OK button. 4. GIMP: Open the Gimp Image Editor. In the File menu, select Filters > Distort > Lens Correction. In the menu that opens, select the Frame Auto-Align button and click OK. C. Lens correction tutorial  simple guide to help you with Lens correction in your photo editing software. (All the information on this tutorial can be found here ) How to save the lens correction result: In Photoshop, Lightroom and CorelDRAW click File > Save
